Delivering more time to care

We know how important it is to provide home care agencies with digital systems that improve productivity, performance and compliance. CareLineLive's all-in-one home care software will increase your business's efficiency and help your carers have more time to care.

Easy to use and affordable all-in-one management software, developed with home care agencies for home care agencies.

Having understood the challenges agencies face, we developed CareLineLive as an all-in-one management solution that improves efficiency, administrative capacity and compliance by digitising workflows and automating processes such as rostering and payroll. CareLineLive enables growth whilst decreasing costs.

Integral to CareLineLive's Management Portal is the Carer Companion App which allows real-time call-monitoring and keeps carers informed of their rotas and service user's care plans. Digital records including task completions, medical administration, welfare observations and visit notes save time and improve compliance and communications with all stakeholders.

Family and key stakeholders can have access in real-time to all information via CareLineLive's Care Circle Portal.

FOR HOME CARE AGENCY OWNERS, MANAGERS AND COORDINATORS

Management Platform

Our system is easy to use and will increase your efficiency, capacity, compliance and profits. CareLineLive is cloud-based so it is quick to set up, requires no expensive hardware and can be used anywhere there is an internet connection.

Our solution has innovative features that will help ease the day-to-day challenges of running your business.

Quick Rostering and Easy Client and Carer Management

Roster client visits and assign preferences for clients (e.g. preferred carer). Make quick changes using drag and drop, plus notify carers of roster changes via push notifications. Easily update client details, care plans, assessments, observations and eMAR with a few clicks, ensuring clients always receive the care they need.

Capacity Planning

Using existing data within CareLineLive, our capacity planning assistant allows managers to confidently and quickly understand whether a new care package can be accommodated given an agency's allocation of carers, their locations, rotas and skills.

Invoicing and Payroll

Call monitoring using our Carer Companion App automates recording of check-in and check-out times for client visits. This enables quick and easy payroll reports and client invoicing. CSV exports can be uploaded to software such as Xero and Sage.

Real-Time Call Monitoring

Keep updated in real-time about carer attendance, visit notes and alerts for missed or late visits and task completions. Live call monitoring, via QR code and GPS location recording of check-ins and check-outs, allow managers to know when a visit has been completed. Lone worker safety is improved.

Effortless Reporting

There are 30 reports that can inform your business from visit financial information to carer utilisation. Not only is this beneficial in pinpointing areas which can be improved but aids with evidencing the performance of standards for regulatory bodies such as ACQS and NDIA.

Keep Family and Friends Up-To-Date

Provide 24/7 access to visit schedules, dates and times. Allow family and friends to access carer notes, observations, administered medication and visit information via our Care Circle Portal, ensuring peace of mind, always. Quick and easy one-off access for emergency services is also possible.

Carer Companion App

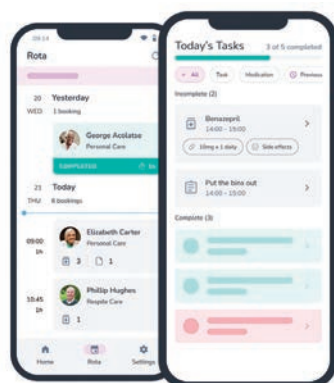

Carers are at the heart of any home care agency, so providing them with the tools to work efficiently and giving them more time to care is essential.

With our Carer Companion App, carers are alerted to changes in their rotas in real-time. Carers can easily access care plans, client details such as address and phone numbers and check information such as tasks and observations required plus medication to administer. A simple navigation process using Google maps will route the carer to the client's address. The app ensures carers are fully informed, increasing their productivity and resulting in less errors during client visits.

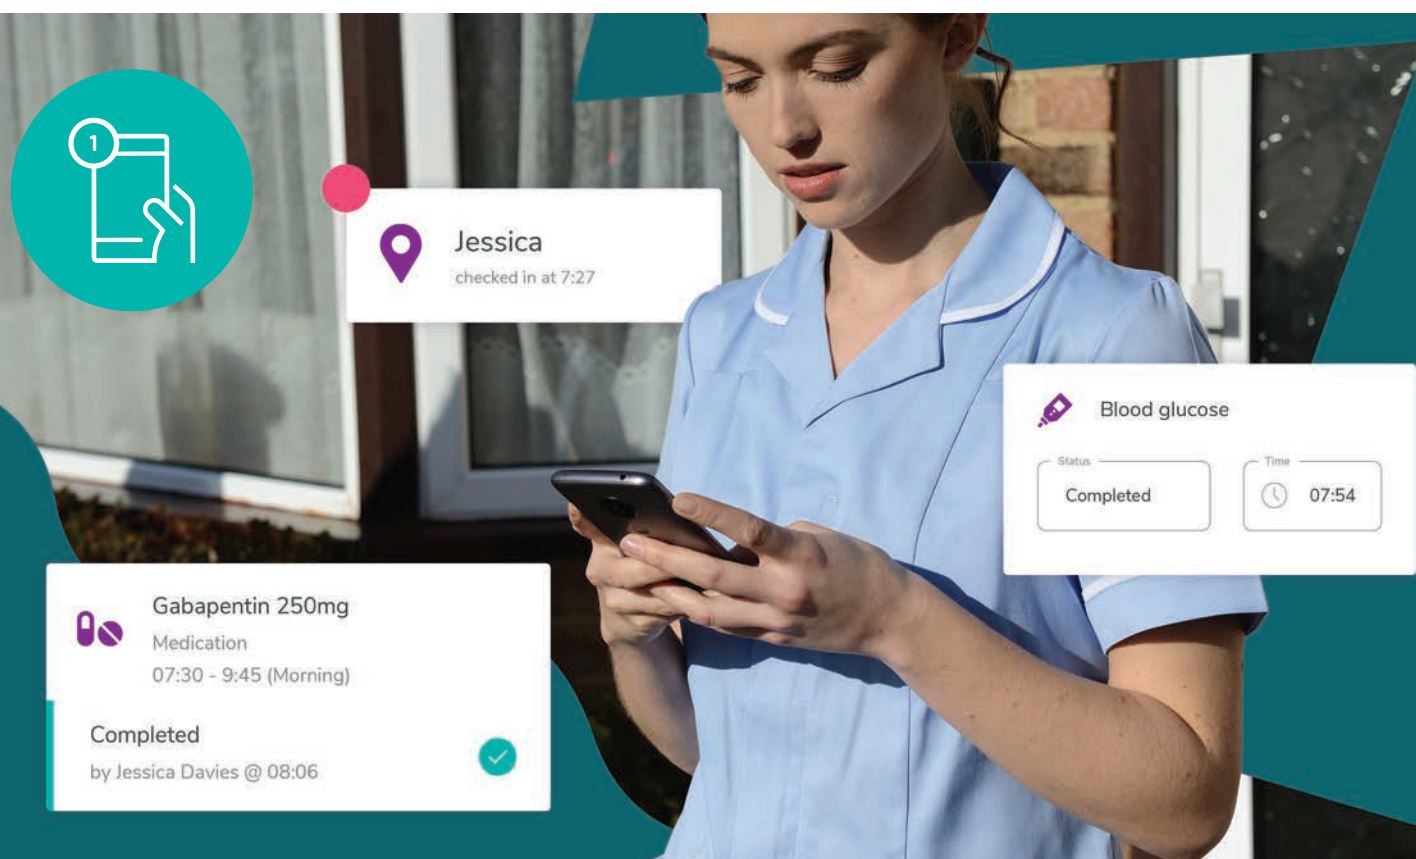

The Carer Companion App uses QR codes unique to each client, as well as GPS location for visit check-in and check-out, enabling verifiable call monitoring and allowing office managers to know the status of a visit in real-time.

We appreciate that different home care agencies have different needs. That's why, with CareLineLive, home care agencies can choose how they access our Carer Companion App.

With the Carer Companion App, paper administration is reduced and information can be accessed in real-time by key stakeholders. Carers can raise a concern and flag its severity so day-to-day challenges can be managed and prioritised.

- ✓ Real-time rota access
- ✓ Verifiable check-in and check-out
- ✓ Photo uploads
- ✓ Client observations
- ✓ Carer task completion and compliance including electronic medication records
- ✓ Carer notes and concerns
- ✓ Client information including care plans
- ✓ Access to Carer Companion App included in the monthly price
- ✓ Improved lone worker safety

PROVIDING RESPONSIVE AND ACCURATE CARE

Carer Tasks including electronic medication

Enabling carers to be kept continuously informed of a client's changing needs. Ensures the status of all carer tasks and clients' medication are accurately recorded.

- ✓ **Easy-to-use tasks with electronic time stamp for completion**
- ✓ **Modifiable completion codes**
- ✓ **Alerts raised for missed or incompleting tasks**
- ✓ **Printable medication charts**

Our Carer Tasks allow home care agencies to record a client's visit requirements including electronic medication records quickly and easily within the Management Platform. It reduces errors and allows for continual monitoring as managers can view medication given, tasks completed, and can be alerted when there is a concern (e.g. when medication has been missed).

Vital medication information can be held for each client, including medication start and finish dates, dosage and route.

Within the Carer Companion App at each client visit, carers can easily view and complete tasks including medication administration. Carers are expected to mark each task as completed. However, in the event a carer is unable to complete a task they can choose from a number of pre-defined status codes, some of which are alertable or require a comment from the carer (e.g. when there is no stock of medication available). Status codes are fully customisable and can be adapted to your business needs.

With our Carer Tasks and electronic medication charts, carers spend less time completing paperwork and more time on providing responsive and personalised care.

Care Circle Portal

Benefit from sharing information easily with family and loved ones in real-time via our Care Circle Portal and allow other stakeholders such as healthcare professionals to be fully informed to offer better person-centred care

Comprehensive client information accessible 24/7 including contact information, next of kin details, medical history, visit details, prescribed medication, observations and more.

Allows one-time temporary instant access to the emergency services to view up-to-date records about a client's care, observations, and medication, enabling effective treatment to be administered.

Our pricing is all inclusive so every aspect of the software is included in your monthly costs: the Management Portal, Carer Companion App and Care Circle Portal.

Reduce the number of client queries: family have access to continuity of care information and communication regarding any issues or updates about their loved one's care.

Have complete control on who sees what client information by assigning roles to different users within the Care Circle Portal.

AUTOMATE YOUR FINANCE WORK PROCESSES

Invoicing and Payroll

Automated carer timesheet management and client invoicing, including traveltime and mileage payments.

CareLineLive allows you to create sophisticated contracts for both your clients and carers that have the rules and data on how you wish to pay your carers and invoice your clients.

The contracts provide you a lot of configuration possibilities such as pay and billing rates for non-social hours, fixed rates, travel time, mileage payments and holiday pay.

Using these contracts and the time data recorded for client visits, gross carer pay and client invoices can be created with a few clicks. This will save immense amounts of administration time compared to using spreadsheets and manually confirming time sheets.

- ✓ **Streamline payroll and invoicing**
- ✓ **Split billing for part private, part local authority funding**
- ✓ **Integration with 3rd party software such as Sage, Xero and others**

“Completing payroll and invoicing through CareLineLive is a large selling point as this has been a massive time saver compared with analogue approaches where even on a spreadsheet with preloaded formulas this will require hour allocations to be input. Once the pay rates and charge rates have been setup in CareLineLive, the software intelligently automates every chargeable call, annual leave, training etc which results in time saving of hours. The larger the company the larger the time and cost save on these tasks.”

Ian Kibukamusoke
Director of Technology, Mega Nursing & Care

Care Planning and Ongoing Care Management

Allows for person-centred care to be delivered because managers and carers can easily access comprehensive information about each and every client.

Client Assessments

By understanding individuals' preferences, likes, and needs, your team ensures thorough knowledge about each client, facilitating the delivery of more personalised care. Managers can record client assessments in the Management Portal enabling informed decision-making that impacts care planning and resource allocation.

There are 15 simple to complete, pre-configured templates including About Me, Conditions and Needs, Fluids and Nutrition and Medication Management.

Moreover, preferences for food and drink, meals and meal times can be recorded.

If the pre-configured templates are not exactly what you require, you can create your own bespoke template using our forms builder.

Observations

Our observations feature can help your carers and managers monitor changes in a client's condition. Identifying problems quickly can help to keep clients safe and ensure that any concerns are addressed before they get worse. Carers can record observations easily in our Carer Companion App.

Observations that can be recorded include fluid intake, meals, blood glucose, blood pressure, heart rate, weight, catheter output and injuries. Any observation that is recorded via the Carer Companion App is immediately visible to managers in the office and assigned stakeholders within the Care Circle Portal enabling quick intervention, if necessary.

Incident Reporting and Carer Concerns

Our incident reporting feature provides a simple and effective way to record and manage incidents within a client's home and helps keep clients safe.

Carers can flag a concern about a client in the Carer Companion App. Managers are notified of relevant concerns and can view how urgently the carer feels it needs to be addressed and any associated comments.

Incident reports can be started from a carer concern or from the Management Portal to ensure that actions are taken and the appropriate processes are followed.

HELPS MANAGERS EASILY DECIDE WHETHER A NEW CARE PACKAGE CAN BE ACCOMMODATED

Capacity Planning

Using existing data within CareLineLive, our capacity planning assistant allows managers to confidently and quickly understand whether a new care package can be accommodated given an agency's allocation of carers, considering their location, rotas and skills.

Reduces the time it takes to complete tender applications for new business opportunities.

Understands whether you have sufficient carers within the location of the new care package request using configurable geofenced areas for carers and teams.

Identifies whether you have carers with the correct skills/traits (e.g. physical lifting restrictions) within the desired location and pinpoints any training that is required for potential new clients.

Checks whether your staff are available for new care package requests by considering carer schedules, annual leave and any clashing visits.

Assists in workforce planning and future carer recruitment requirements to optimise profitability.

Management Reports and Regulatory Compliance

A suite of reports and other tools will inform you on the health and performance of your business and will enable you to evidence how you are complying with your regulatory framework.

Create and customise your own forms for audits, risk assessments and care plans. Schedule carer and client reviews to keep on top of carer training and qualification requirements and changing client needs.

Real time reports with filters provide valuable data and insights which not only allow you to predict and avoid issues but also to make important business efficiencies and improvements.

Easily provide evidence for compliance purposes at the click of a mouse:

- ✓ Auditing - the trail of rostering changes is fully documented. Electronic medication record charts allow easy auditing of medication administration
- ✓ Carer and client reviews – schedule reviews and spot checks to improve compliance and performance standards
- ✓ Carer training and requirements – ensure all carer training and qualifications are up-to-date with our reporting and alert functions
- ✓ Contingency planning – react quickly when the unexpected happens, improve risk management and plan more effectively
- ✓ Document storage against clients and carers with the option to make them viewable in the Carer Companion App
- ✓ Digital forms including e-signatures - minimise paper records with customisable digital forms streamlining data capture with secure data storage. Send PDF documents for e-signatures to carers, clients and other stakeholders
- ✓ Visit verification – complete visibility of client visits including carer check-in and check-out times, completion of tasks, care provisioning notes and alerts

SECURING YOUR DATA AND MAKING YOUR SOFTWARE AVAILABILITY RESILIENT

Disaster Recovery and Cyber Security

Online security and 24/7 availability shouldn't be a headache for you to contend with.

With cyber attacks becoming more sophisticated and prevalent, you need a software solution with robust cyber security and effective disaster recovery processes at its heart.

With CareLineLive's effective security and back-up systems, and fully compliant data protection measures in place, you can offer carers, clients and their families greater peace of mind.

We take care of keeping your data safe in the cloud. Only accessible by authorised users and no need for local back-ups. Point in time recovery back-ups are available in five minute increments and nightly server snapshots are retained for 35 days. Data is stored in AWS servers in Sydney, Australia.

Our security credentials:

- ✓ ISO 9001: Quality Management and 27001: Information Security Management certified
- ✓ NHS Data Security Protection Toolkit compliant
- ✓ Regular automatic vulnerability scanning and penetration tests by independent third-party cyber security firms
- ✓ Cyber Essentials Plus Certified

PERSONAL AND HUMAN SUPPORT TO HELP YOU BECOME SUPERUSERS

Onboarding and Ongoing Support

Rightly so, our customers demand the best service and we deliver.

At CareLineLive, not only do we place great importance on what we deliver, but how we deliver it. Our team have many years of expertise within the home care sector and understand the challenges home care agencies face.

We will ensure a stress-free onboarding process during which our expert staff will train you and demonstrate how to fully benefit from CareLineLive.

Additionally, once CareLineLive is integrated into your business, you'll have access to our friendly, helpful team who will be quick to respond if you have any questions or need help.

Our UK or Australian support teams can be easily contacted by phone, email or help messenger tool.

'CareLineLive has been superb in onboarding us when we first started using the platform. Their customer support team are not only good at training but also in helping with day to day queries about how to achieve certain objectives we have using their software. They are approachable and we've found it easy to use their telephone and email support channels.'

David Johnson
Managing Director, My Homecare Franchise Group

CareLineLive is an All-In-One Home Care Management System

Cloud-hosted, accessible anywhere at any time.

We understand that home care agencies are all different and have unique requirements for their care management system. This features and benefits matrix shows how each module contributes to your overall care ecosystem.

Better systems mean better care, but don't just take our word for it.

"CareLineLive provides our team with one system to have all the information we need to ensure our clients receive the care they need it with easy scheduling. We would be a lot less productive without CareLineLive. Time has been saved, communication is easier with carers. Reporting and payroll are much easier"

Nichola Potter

Community Nurses Australia

"Unlike our previous system, we were looking for a system that was user friendly... with CareLineLive our processes are more automated so it's reduced our workload and made our lives a lot easier"

Ali Sharif

Director of Communications
Sunlight Care Group

"CareLineLive saves us time, is very cost effective and enables constant communication between the managers, the carers and also the families of the care recipient. We work remotely and CareLineLive allows us to intervene when carers have got concerns, you can also use the app to take photos so when we do wound dressings someone experienced is able to review from our end. It saves time, is very cost effective and there is always constant communication between the carers, the managers and also the families so everybody knows exactly what is happening"

Busi Faulkner

Home Care Nurses Australia

"When we had a glitch that was resolved very quickly - we just had to email the support team who sorted it out. Support always get back to us within 24 hours"

Wendy McDonald

Healthy Life Community
Services Australia

"CareLineLive has been instrumental in elevating the quality of our disability support services. Instant access to client information, streamlined digital reporting, and reliable geolocation tracking"

Jo Oluafe

Healthy Life Community Service

Helping to Complete the Circle of Care

Would you like to streamline and digitise your processes, improve productivity and provide better care? We'd love to show you how CareLineLive can help your home care business to:

- ✓ Improve efficiency, capacity and compliance
- ✓ Ensure easy rostering, payroll and invoicing
- ✓ Enables person-centered responsive care
- ✓ Keep family and key stakeholders informed
